Neighborhood Socio-Racial Composition and the Spatial Reach of Park Visitation in New York City

First Author | SCI-Indexed Journal Article

- Published in Land, 15(10), 1818. Analyzed mobility, census, park inventory, and built-environment data using spatial statistical models to examine neighborhood-level relationships between socio-racial composition and the spatial reach of park visitation in New York City.

DOI: 10.3390/land15101818

2026.10

Beyond Distance: How Thermal Comfort and Built Environment Shape Park Visitation, City Liveliness, and Service Equity in Los Angeles

Co-Author | Under Review, Urban Forestry & Urban Greening

- Qiao, J., Zhu, Z., Qian, J., Hu, S., & Wu, T. Examines how thermal comfort and the built environment, beyond distance, shape park visitation, city liveliness, and park service equity in Los Angeles.

Manuscript No. UFUG-D-26-03179

Evaluating NYC Park Renovations: Visitor Origins and Local Benefit Capture

Master's Thesis | Ongoing Research

- Examining how the type, scale, and amenity content of NYC park renovations influence visitor origins and local benefit capture. Using longitudinal mobile-device mobility data to analyze temporal changes in visitor composition and evaluate who benefits from park investments.

2024.09-2025.06

Zhonghua Shipyard Water-Culture Themed Spatial and AR Visual Design

Independent Project

- Developed a water-culture themed spatial and AR experience based on the industrial heritage of Zhonghua Shipyard and the urban wastewater purification process. Created an eight-node narrative sequence, dual-route interaction system, AR interface prototype, and final spatial design proposal with physical models.

WORKING EXPERIENCE

2024.06-2024.09

Design Intern
Hangzhou Urban Transport Planning and Design Institute

- Assisted with preliminary data collection and synthesis for design projects, and supported subsequent research, coordination, and planning work through later project stages.

WORKSHOP

2022.09-2022.12
New Media Picture Book Design
Team Leader
- Led the design of an anti-war interactive picture book, building the narrative from a child's perspective and developing the iOS version in Unity.

2023.02-2023.06
Interactive Art Installation Design
Team Leader
- Explored urban renewal through the phenomenon of abandoned phone booths in Shanghai, producing an interactive installation, physical model, and first-person animation.

2023.09-2023.12
Functional Game Design
Team Member
- Contributed to the design of a functional music game for children with speech impairments, supporting user research and production in Unity and After Effects.

2024.02-2024.06
Shanghai Science and Technology Museum Artificial Intelligence Exhibition Renovation
Team Leader
- Conducted site research and industry visits; led the spatial redesign of the robotics exhibition toward an AI-oriented exhibition hall.

2024.02-2024.06
Weijin Shuangquan Mineral Water Brand Strategy Planning
Team Leader
- Conducted market research on younger consumers and led youth-oriented branding and packaging strategy development.

2024.02-2024.06
Jinping Road Urban Furniture Design
Team Leader
- Proposed an integrated urban furniture strategy in response to aging community infrastructure, including child-friendly guardrails and pocket park spaces.

SOFTWARE SKILLS

- **Python, ArcGIS, QGIS, Google Earth Pro, Grasshopper, Rhinoceros 3D, AutoCAD, SketchUp**, Adobe Illustrator, Adobe InDesign, Adobe Photoshop, Adobe After Effects, Enscape, D5 Render
